

Results-driven Full Stack Developer with analytical thinking and a proven ability to master new technologies independently and rapidly. Experienced in end-to-end web development, integrating advanced AI tools to streamline workflows and enhance system performance. A collaborative team player with excellent interpersonal skills, excelling in solving complex logical problems in dynamic, high-pressure environments while maintaining rigorous coding standards.

Professional Experience

Ministry of Education | Software Developer | September 2025 – January 2026

IRG Project (Organizational Unit Management System)

- **Full-Stack Development:** Developed a complex hierarchical management system using **.NET 8** and **Angular 19**, utilizing layered architecture and Standalone components.
- **Backend Engineering:** Implemented **Generic Repository** patterns, worked extensively with **EF Core 8**, and managed recursive relationships within **SQL Server**.
- **Security & Authentication:** Established a **BFF (Backend for Frontend)** layer, implemented **OIDC authentication (ADFS)**, managed Token Refresh cycles, and integrated CSRF protection.
- **Performance & State Management:** Optimized performance using **Redis Caching** (Cache-Aside pattern) and managed reactive state using **Signals** and **NgRx**.
- **UI/UX Development:** Designed a dynamic UI using **PrimeNG**, featuring complex data tables, tree views, and Role-Based Access Control (RBAC).

Notable Projects

- Backend: Node.js, C#, Web API, SQL Server, MongoDB.
- Frontend: React 19, JavaScript, HTML5, CSS3.
- Developed advanced dynamic UI, product catalog, filtering, and real-time shopping cart management.
- Built APIs for inventory management, orders, and users.
- Implemented an Admin Panel for CRUD operations.
- Modern responsive design, optimized for fast loading and high performance.

Education.

2024–2026

Software Practical Engineering | "Ha-Chadash" College, Jerusalem – Studies toward a Software Engineering degree certified by MAHAT.

"Ultra Code" Course | Advanced program specializing in high-tech subjects: Algorithms, Data Structures, Graph Theory, and Operating Systems.

Teaching Studies | Studies toward a "Senior Teacher" degree.

Certificate of Excellence | Certificate of Excellence in English from "Kivun" College

2020-2024

"Ha-Chadash" High School, Jerusalem Graduated with Honors; High School Diploma (Szold Institute / Matriculation equivalent), including 5 units of Mathematics

Technical skills

- **Programming Languages:** Java, C, C#, Python (Django).
- **Web Development:** Angular 19, React 19, Node.js, JavaScript, TypeScript, .NET Core, Spring Boot, Web API, HTML5, CSS3.
- **Databases:** SQL Server, MongoDB, BI, Redis, Hadoop.
- **Operating Systems:** Linux/Unix, Windows.
- **Development Tools & Environments:** AWS, Azure, Git, Postman, Visual Studio, Salesforce, VS Code, PyCharm, SelsFors, Eclipse.

Technical Expertise

AI Development Tools: Highly proficient in utilizing GenAI tools (such as GitHub Copilot and Amazon Q) to streamline development and ensure high-quality code.

Microservices: Experienced in designing and developing distributed systems using Microservices architecture.

Languages

Hebrew: Native speaker. **English:** Highly proficient (Technical and Spoken).
